

SECURITY POLICY

POLICY STATEMENT

HBK recognises the importance of the protection of its and the engineer's assets, and to this end shall ensure so far as is reasonably practicable, that all persons, property and the environment are protected against incidents, theft, misappropriation or unauthorised disclosure.

In fulfilling this commitment, HBK shall establish and maintain an environment in which accidental losses and theft are minimised through the implementation of recognised good business practices, compliance with legislation and standards, and the elimination or containment of hazards which may otherwise result in personal injury, fire, property or environmental damage, occupational illness and material losses.

OBJECTIVES

Pursuant to the policy statement above our objectives to establish a positive and effective approach to securing project's assets are:

- To complete the project without sustaining theft or damage to, or unauthorised use of, materials and equipment.
- To complete the project without sustaining loss or unauthorised disclosure of confidential information.
- To establish a means of stopping unauthorised individuals or vehicles from entering construction and commissioning areas.
- To prevent sabotage of plant and equipment.
- To establish an effective working relationship and co-operate with the Engineer's security personnel.
- To work in harmony with the engineer and share knowledge of concerns and initiatives relating to the project.

The successful implementation of this policy is supported by continual commitment of all employees and subcontractors to provide a positive security culture in the projects we undertake.

Sheikh Ali Bin Hamad Al Thani
President

Security Policy Revision 0 dated 30 October 2019
